## Continuation Sheet (PTOL-303) 09/264,464

Application No.

Continuation of 2. NOTE: Claims 24,29,37 and 41 all have been amended to include a new limitation that the support structures lift the tissues overlying the nasal passages, instead of the before-claimed reducing the draw of the supporting tissues inward toward the nasal passages. This would require new consideration. While Anderson may not "recite" side pieces for applying over nasal passages of a horse or a bridge piece for extending between the sides when applied to the nose of a horse; Anderson does disclose a device which is capable of performing the recited functions and could be used in the intended manner. By the same token, the applicants device could be used on a persons back as a support device, even though this is not "recited".
